American Academy of Arts and Sciences Archives

Series I-C-2: Communications to the Academy (unbound), 1767-1931

Administrative Information

Scope and Content

This series contains communications, most in the form of handwritten letters or signed documents, sent to the American Academy for consideration, discussion, and possible publication. Each entry notes the author's date of election to the Academy, and for articles published by the Academy, the citation to its location in the Academy's *Memoirs* or *Proceedings*. Note: Academy serial publications are available through JSTOR: <http://www.jstor.org>.

Historical Note

During the first years of the Academy's Archives Initiative, archivists assembled communications from various locations within the collection.

Archival Arrangement

The communications are now arranged alphabetically by author; in cases where author is unknown, documents are filed at the end of the series, in alphabetical order by title.

Subjects

Agriculture
Astronomy
Botany
Geology
Geomagnetism
Inventions
Letter books
Meteorology
Natural history
Public health

Item List

Box 1

Folder 1 Copy of Sermon preached Aug. 24, 1808 at Sandwich before the scholars & by the request of the Trustees of the Academy in that place, [1808 or later]; [Sandwich, MA].

Preaches “the duty of teaching children out of the sacred Scripture & conversing with them on religious subjects”, ends with prayer.

Creator: [Allyn, John, 1767-1833]; elected 1808

Note: Given at Sandwich Academy.

Image: <http://www.amacad.org/archive/images/007990.025.jpg>

Folder 2 Description of the Hydrometer and the use of it.

Provides detailed dimensions and composition of an instrument used to measure the ratio of the density of “spirit or any liquid lighter than water” to the density of water. Further provides the instructions for use. Contemporary handwriting in pencil notes the communication requires a figure for illustration.

Creator: Blodget, Samuel

Note: Possibly the work of one of two Samuel Blodgets: Blodget, Samuel, 1724-1807; or Blodget, Samuel, 1757-1814.

Image: <http://www.amacad.org/archive/images/008000.001.jpg>

Image: <http://www.amacad.org/archive/images/008000.002.jpg>

Image: <http://www.amacad.org/archive/images/008000.003.jpg>

Folder 3 Letter from William Cranch Bond to John Pickering, 1842 May 24;
Cambridge, MA.

Encloses the magnetic and meteorological observations of J. Melville Gillis, at his request. Comments that their own magnetic observations have been recorded every ‘term day’ for a year while meteorological observations with “the new Standard Barometer” continue.

Creator: Bond, William Cranch, 1789-1859; elected 1835

Image: <http://www.amacad.org/archive/images/008005.001.jpg>

Folder 4 Letter from [J. Ingersoll Bowditch], [after 1833].

Two tables with explanation, one by a factor of five years and one, deduced from the first, by a factor of one, giving the number of white persons in the US, per the 1830 census. Speculates as to life expectancy.

Creator: [Bowditch, Jonathan Ingersoll, 1806-1889]; elected 1834

Image: <http://www.amacad.org/archive/images/008007.001.jpg>

Image: <http://www.amacad.org/archive/images/008007.002.jpg>

Image: <http://www.amacad.org/archive/images/008007.003.jpg>

- Folder 5 Letter from [Nathaniel] Bowditch to [Edward] Everett, 1815 December 25; Boston.

Solves a mathematical problem noted as the “Mr. Croswell’s question” posed in [Thomas] Leyburn’s edition of The Ladies Diary, vol. 4, p 344.

Creator: [Bowditch, Nathaniel, 1773-1838]; elected 1799

Image: <http://www.amacad.org/archive/images/008010.001.jpg>

Image: <http://www.amacad.org/archive/images/008010.002.jpg>

- Folder 6 Application of Napier’s rules for solving the cases of right-angled spherical trigonometry to several cases of oblique-angled spherical trigonometry.

Points “out a small alteration in the expression of [Napier’s] rules so that they may include the solutions of most of the cases of oblique-angled Spherical Trigonometry, in a more simple manner...”.

Creator: Bowditch, Nathaniel, 1773-1838; elected 1799

Image: <http://www.amacad.org/archive/images/008015.001.jpg>

Image: <http://www.amacad.org/archive/images/008015.002.jpg>

Image: <http://www.amacad.org/archive/images/008015.003.jpg>

Image: <http://www.amacad.org/archive/images/008015.004.jpg>

Image: <http://www.amacad.org/archive/images/008015.005.jpg>

Image: <http://www.amacad.org/archive/images/008015.006.jpg>

- Folder 7 Letter from [Nathaniel] Bowditch, 1814 August 26.

Responds to Mr. Brosius’ “Observation on Proposition 44th of Vince’s spherical trigonometry”. Suggests the simpler solution by means of the perpendicular; gives examples.

Creator: [Bowditch, Nathaniel, 1773-1838]; elected 1799

Note: Possibly a reference to Samuel Vince's Treatise on Plane and Spherical Trigonometry (1800).

Image: <http://www.amacad.org/archive/images/008020.001.jpg>
Image: <http://www.amacad.org/archive/images/008020.002.jpg>

Folder 8 [Sea Serpents, 1810, #4] addressed to John Quincy Adams, 1804 May 22; Wiscasset.

Presents accounts which he has collected on sightings of a sea serpent in Penobscot Bay by Abraham Cummings, Alexander McLean, George Little, and Elezar Crabtree.

Creator: Bradford, Alden, 1765-1843

Image: <http://www.amacad.org/archive/images/008024.001.jpg>
Image: <http://www.amacad.org/archive/images/008024.002.jpg>
Image: <http://www.amacad.org/archive/images/008024.003.jpg>
Image: <http://www.amacad.org/archive/images/008024.004.jpg>

Image: <http://www.amacad.org/archive/images/008024.006.jpg>

Folder 9 [Sea Serpents, 1810, #2], 1810 October 25; Wiscasset.

Explains interest in sighting of sea serpents in Penobscot Bay; at request, notes enclosures supplying anew statements of sightings. Copy of Capt. Elezar Crabtree's statement on sighting a Sea Serpent in Penobscot Bay.

Creator: Bradford, Alden, 1765-1843

Image: <http://www.amacad.org/archive/images/008025.001.jpg>
Image: <http://www.amacad.org/archive/images/008025.002.jpg>
Image: <http://www.amacad.org/archive/images/008025.003.jpg>

Folder 10 Letter from Charles Brooks to John Pickering, 1841 June 9; Place de L'Odeon, 5, Paris.

Details Paris's new artesian wells, including their operation and history of construction.

Creator: Brooks, Charles

Image: <http://www.amacad.org/archive/images/008035.001.jpg>

Image: <http://www.amacad.org/archive/images/008035.002.jpg>

Image: <http://www.amacad.org/archive/images/008035.008.jpg>

Image: <http://www.amacad.org/archive/images/008035.009.jpg>

Folder 11 On the Method of discovering the roots of a Cubic Equation by means of the division of its last term.

Explains how to solve an equation with only one unknown term.
Includes examples.

Creator: [Brosius, F. X. (Francis Xavier)]

Image: <http://www.amacad.org/archive/images/008040.001.jpg>

Image: <http://www.amacad.org/archive/images/008040.002.jpg>

Image: <http://www.amacad.org/archive/images/008040.007.jpg>

Image: <http://www.amacad.org/archive/images/008040.008.jpg>

Folder 12 Observation on Proposition 44th of Vince's spherical trigonometry.

Offers an improvement, expanding the application of Vince's proposition to all possible cases.

Creator: [Brosius, F. X. (Francis Xavier)]

Note: Possibly a reference to Samuel Vince's *Treatise on Plane and Spherical Trigonometry* (1800).

Image: <http://www.amacad.org/archive/images/008045.001.jpg>

Image: <http://www.amacad.org/archive/images/008045.002.jpg>

Image: <http://www.amacad.org/archive/images/008045.003.jpg>

Image: <http://www.amacad.org/archive/images/008045.004.jpg>

Folder 13 Letter from Marshall Conant, 1846 February 17; Framingham, MA.

Describes the ‘solar index’, an instrument that attaches to the surveyor’s compass showing variation of the magnetic from the true meridian. Details the construction, instructs on use, and provides a diagram.

Creator: Conant, Marshall, 1801-1873

Image: <http://www.amacad.org/archive/images/008045.001.jpg>

Image: <http://www.amacad.org/archive/images/008045.002.jpg>

Folder 14 A practical essay on raising apple trees, and making cider, 1789 July 23; Frome school, Somerset, England.

Describes how to grow apple trees, detailing the proper preparation of the soil, and care for both seedlings and saplings. Further describes procedures of transplantation, grafting and pruning, and harvesting. Provides steps to press juice and make cider thereof, with particular

care to the apparatus. Annotations include a list of the best varietals for cider, the economics of raising trees to sell and different types of fermentation.

Creator: Crocker, A. (Abraham)

Folder 15 Arithmetical solution of the Diophantine problem for dividing a given number, consisting of two given square numbers, into two other square numbers addressed to Thomas L. Winthrop, 1824 August 10; Mr. Bates's, Hawkins' Street, Boston.

Offers a solution of a noted problem of Diophantus. Croswell notes he is sending it to Winthrop to present to the Academy as they were classmates at college.

Creator: Croswell, William, 1760-1834

Image: <http://www.amacad.org/archive/images/008070.001.jpg>

Image: <http://www.amacad.org/archive/images/008070.002.jpg>

Image: <http://www.amacad.org/archive/images/008070.003.jpg>

Folder 16 Letter from [William] Croswell.

Gives rules and examples abridging computations: 1.) To find the Squares of a Number whose highest figures are between 40 and 60 2.) To find the Products of Numbers whose highest figures are between 40 and 60.

Creator: [Croswell, William, 1760-1834]

Image: <http://www.amacad.org/archive/images/008075.001.jpg>

Image: <http://www.amacad.org/archive/images/008075.002.jpg>

Image: <http://www.amacad.org/archive/images/008075.003.jpg>

Image: <http://www.amacad.org/archive/images/008075.004.jpg>

Folder 17 Letter from William Croswell to John Davis, Tuesday Evening; Boston.

Presents two tables of the varieties in the first and second varieties of Oblique spheres. Notes he is sending it to Winthrop to present to the Academy on account of a former acquaintance.

Creator: Croswell, William, 1760-1834

Image: <http://www.amacad.org/archive/images/008080.001.jpg>

Image: <http://www.amacad.org/archive/images/008080.002.jpg>

Image: <http://www.amacad.org/archive/images/008080.003.jpg>

Image: <http://www.amacad.org/archive/images/008080.005.jpg>

Folder 18 Letter from August Dauber, 1895 January 7; Bochum, Germany.

Theorizes that positive electricity is composed of oxygen and negative electricity is composed of nitrogen, contrary to the theories of Professor Crookes of the Royal Society in London. Asks the Academy to make their own investigations and encloses a copy of an essay noted as Essay III. which states the effect of nitrogen in chemical and electrical reactions.

Creator: Dauber, August

Note: The essay marked ‘Abschrift’ or ‘copy’ has a red pencil notation of ‘III.’.

Image: <http://www.amacad.org/archive/images/008085.001.jpg>

Image: <http://www.amacad.org/archive/images/008085.002.jpg>

Image: <http://www.amacad.org/archive/images/008085.003.jpg>

Image: <http://www.amacad.org/archive/images/008085.005.jpg>

Folder 19 Letter from John Davis to John Adams, 1807 November 10; Boston.

Forwards a new copy of the inscription on Dighton Rock made by Mr. Kendal. Describes how Mr. Kendal made the original watercolor copy from which this oil copy was made.

Creator: Davis, John, 1761-1847; elected 1792

Image: <http://www.amacad.org/archive/images/008089.001.jpg>

Image: <http://www.amacad.org/archive/images/008089.002.jpg>

Image: <http://www.amacad.org/archive/images/008089.003.jpg>

Folder 20 Letter from John Davis to Samuel Webber, 1809 August 8; Boston.

Uses various accounts of Native cultures recorded by such as Champlain and Le Hontan to reason meanings of the figures that appear on Dighton Rock; notes Washington had commented to Dr. Lathrop that he had seen such inscriptions elsewhere in his opinion to have been done by Native Americans.

Creator: Davis, John, 1761-1847; elected 1792

Image: <http://www.amacad.org/archive/images/008090.001.jpg>

Image: <http://www.amacad.org/archive/images/008095.004.jpg>

Folder 22 Letter from John Davis to Nathaniel Hall, 1830 August 11; Boston.

Describes a shark caught on New England Coast in 1793, identified by the author as Squalus Cornubicus, or a Porbeagle. Includes illustration in pencil.

Creator: Davis, John, 1761-1847; elected 1792

Image: <http://www.amacad.org/archive/images/008100.001.jpg>

Image: <http://www.amacad.org/archive/images/008100.002.jpg>

Image: <http://www.amacad.org/archive/images/008100.004.jpg>

Folder 23 Thoughts on smoky houses, [before 1786 August 23].

Details effect of smoky houses on health. Offers criticisms of chimney designs and proposes improvements so as to smoke less. Contemporary note in pencil, “Differs from Count Rumford as to the threat of chimnies. Not be Published”.

Creator: [Deane, Samuel, 1733-1814][; Charter Member, 1780

Image: <http://www.amacad.org/archive/images/008105.001.jpg>

Image: <http://www.amacad.org/archive/images/008105.002.jpg>

Image: <http://www.amacad.org/archive/images/008105.012.jpg>

Folder 24 Remarks on the construction of the common scale beam, with a description of the new gold standard beam, 1801 August 10.

Creator: Dearborn, Benjamin, 1754-1838; elected 1794

Note: Includes cross-hatching in pencil over descriptions of gold standard beam and addendum.

Image: <http://www.amacad.org/archive/images/008110.001.jpg>
Image: <http://www.amacad.org/archive/images/008110.002.jpg>
Image: <http://www.amacad.org/archive/images/008110.003.jpg>
Image: <http://www.amacad.org/archive/images/008110.004.jpg>
Image: <http://www.amacad.org/archive/images/008110.005.jpg>
Image: <http://www.amacad.org/archive/images/008110.006.jpg>
Image: <http://www.amacad.org/archive/images/008110.007.jpg>
Image: <http://www.amacad.org/archive/images/008110.008.jpg>
Image: <http://www.amacad.org/archive/images/008110.009.jpg>

Folder 25 Letter from Benjamin Dearborn, [ca. 1801].

Revises gold standard beam of the author's invention. Addendum notes one further design of a common scale beam. Further includes illustration of gold standard beam.

Creator: Dearborn, Benjamin, 1754-1838; elected 1794

Image: <http://www.amacad.org/archive/images/008115.001.jpg>

Image: <http://www.amacad.org/archive/images/008115.002.jpg>

Image: <http://www.amacad.org/archive/images/008115.007.jpg>

Folder 26 Letter from Benjamin Dearborn, 1801 May 26; Boston.

Describes a beam of his design done at the request of George Burroughs for weighing gold, constructed on the, “principles...of extreme accuracy, and Freedom of Oscillation, to the exclusion of Lateral Vibrations and other impediment.” Mentions possibility of a patent and presents it to the Academy for their inspection.
Contemporary note that letter was committed to Mr. Webber, Dr. Prince, and Mr. Bowditch.

Creator: Dearborn, Benjamin, 1754-1838; elected 1794

Image: <http://www.amacad.org/archive/images/008120.001.jpg>
Image: <http://www.amacad.org/archive/images/008120.002.jpg>

Folder 27 Letter from Jean Baptiste Joseph Delambre.

Opines that Bowditch’s mathematical method is superior.

Creator: Delambre, J. B. J. (Jean Baptiste Joseph), 1749-1822; elected 1822, FHM

Image: <http://www.amacad.org/archive/images/008125.001.jpg>

Folder 28 An account of some of the mineral productions of the state of New York, with specimens of each addressed to E. Pearson, 1799 September 2; Albany, NY.

In the care of Rev. Mr. Kirkland, transmits transactions of the Society as promised. Also takes the opportunity to send to the Academy mineral specimens described therein. Remarks on the value of natural history collections.

Creator: Society for the Promotion of Agriculture, Arts, and Manufactures; elected 1800

Note: Benjamin DeWitt (1774-1819) was elected to the Academy in 1800. John Thornton Kirkland (1770-1840; elected 1799) and Samuel Kirkland (1741-1808; elected 1790) were both alive, fellows, and clergy members at this time. John Thornton Kirkland's affiliation at the time of election was in Boston, MA; Samuel Kirkland's affiliation at the time of election was in Oneida, NY.

Folder 31 Letter from Peres Fobes to Benjamin Dearborn, 1796 July 19;
Raynham, MA.

Apologizes for forgetting to address previous letter to Dearborn.
Encloses a copy of his description of the “state of new arts and
manufactures which have been introduced into the Southern
Counties.” Focuses on the manufacture of tin and iron.

Creator: Fobes, Peres, 1742-1812; Charter Member, 1780

Folder 34 Dissertation on the Dangers to which Incautious Divers are Exposed &c., [1809 March 6].

Recounts the accidents of divers who “incautiously go down in the Diving Bell”, in particular of Mr. Spalding and his nephew. Also summarizes an account of Cornelius Drebell [sic] written by a Mr. Boyle. Concludes with recommendations on diving safely.

Creator: Fothergill, A. (Anthony), 1732?-1813

Note: 'Mr. Spalding' is Cornelius Spalding (1738-1783). Cornelius Drebbel was the inventor of a navigable submarine.

Folder 39 Mineralogical Observations: Made in the Environs of Boston, in the years 1807 & 1808 addressed to [John Davis], [1808 or later].

Defines terms before providing descriptions of a series of minerals, their uses, and where they may be found. Occasionally uses a nomenclature created by the author. Notes in conclusion a lack of metals and that a description of Massachusetts agrees with a now-unknown place ancient Greeks and Romans procured stones.

Creator: Godon, Silvain, 1774-1840; elected 1808

Note: Related “Tabular View...” aggregate minerals correspond to those here. Furthermore, The General Repository and Review, Vol. 2, published by William Hillary (1812) report of this communication notes an accompanying Tabular View and the misspelling of garnet as ‘Garnat’ there. However there are slight differences in the handwriting.

Folder 45 Remarks on the Discovery of the Application of Inhalation of Vapour of Sulphuric Ether, 1847 February 27; Boston.

Describes the composition of ether, how to prepare and administer it, and the effect on the body. Details his communication with W. G. Morton on his discoveries, and responsibility for the surgery at Massachusetts General Hospital in which ether was administered. Concludes with applications to animals.

Creator: Jackson, Charles T. (Charles Thomas), 1805-1880; elected 1837

Note: First claim of Dr. Jackson in the eventual “Ether Controversy”. Printed day before read at Stated Meeting in the Boston Daily Advertiser, March 1, 1847, “the following paper addressed by Dr. Jackson to the Academy”.

Folders
10-11 Letter from Matthew Fontaine Maury to Secretary of the Academy,
1848 March 8; Observatory, Washington.

Encloses copy of Urbain Le Verrier's "reply to the opinions of Professor Peirce with regard to the planet Neptune," which he sends because Prof. Pierce's opinions have become part of the Proceedings. Le Verrier Replies to the remarks of Mr. Pierce on the observations of the Satellite of Neptune made by Mr. Lassel. Notes an established error in calculations referring to Neptune; claims there is a new theoretical error regarding Uranus; details both errors, with special attention to that which regards Uranus.

Creator: Maury, Matthew Fontaine, 1806-1873; Le Verrier, U.-J.
(Urbain J.), 1811-1877

Note: "Prof. Peirce" is likely Benjamin Pierce (1809-1880; elected 1834)

Image: <http://www.amacad.org/archive/images/008465.003.jpg>

Folder 8 An Essay on the Tide in the Hemisphere opposite to the Moon.

Proposes that Isaac Newton’s theory of tides, as solely the result of water’s gravitation to the sun, does not explain tide behavior fully; further proposes viewing the tide as a wave, caused by the gravitational pull of the earth. Includes illustrations.

Creator: [Tenney, Samuel, 1748-1816]; elected 1791

Folder 10 Letter from [Daniel] Treadwell, [ca. 1860].

In light of the “great calamity which recently fell upon Lawrence”, recounts and critiques experiments done on the strength of cast iron, pointing out contradictions in the rules and tables used by builders.

Creator: [Treadwell, Daniel, 1791-1872]; elected 1823

*Note: Pasted preface notes its presentation at an Academy Meeting.
Likely refers to the Pemberton Mill Collapse (1860) in Lawrence, MA.*

Folder 14 An Essay to explain the Story of Phaeton, 1806; New Haven, CT.

Recounts the myth of Phaeton; explores origins of the myth given by Horace, Ovid, and Pliny, concluding the evidence supports it to be due to a comet; however ultimately agrees with Orosius the myth is most likely the result of a volcano explosion during the time of the Plagues of Egypt.

Folder 15 Letter from [Noah] Webster, ca. 1794.

Describes observations on dew which lead him to conclude dew evaporates and condenses.

Creator: [Webster, Noah, 1758-1843]; elected 1799

*Note: Incomplete, comprising pages 100-103 of what is printed in
Memoirs.*

Image: <http://www.amacad.org/archive/images/008505.001.jpg>

Image: <http://www.amacad.org/archive/images/008505.002.jpg>

Folder 16 [Sea Serpents, 1810, #3], 1810 August 22; Portland, [MA].

Responds to request to, “make inquiry of Capt. Crabtree, respecting the sea monster...”; provides an account of a sea monster about 60 feet long spotted in sight of Mount Desert, seemingly attracted by the smell of dinner.

Creator: Weeks, Lemuel

Image: <http://www.amacad.org/archive/images/008510.001.jpg>

Image: <http://www.amacad.org/archive/images/008510.002.jpg>

Folder 17 His Verses [with that in them which is] for those kindest hearted addressed to The Boston Globe, 1899 November 18; Berkeley, CA.

Poems: “Words that Have Come Down Out of the Sun”, “To Join the Order of Armeageddon”, “The Flag in Which is Held Man’s Hope”, “The Kingdom to Come”, and “Meditations on Mortality”. Various topics with notes of the poet; introduction includes “Press Notices of Another Work” and “Publisher’s Note” - which states the offer will copy out his work on request.

Creator: Welcker, Adair, 1858-1926

*Note: Forwarded from the Boston Globe to the Academy in Nov 25,
1899 letter.*

Folder 18 Observations of the Transit of Mercury over the Sun's Disc, November 5th, 1789, made at Cambridge; [Cambridge, MA].

Describes method of observation; gives method for determining Mercury's semi-diameter, latitude and time of "eliptick [sic] conjunction".

Creator: Willard, Joseph, 1738-1804; Charter Member, 1780

Note: Incomplete, pages 1-4 and 9-16. Published in full in Memoirs.

Folder 19 Experimental Evidence to Show the Disturbance of a Magnetic Field by Sound Waves addressed to Sturgis Bigelow, 1919 May 14.

Describes experiments on the effect of sound waves on magnetic fields, aspects of which were previously tested with Mr. Benson as a means to detect submarines.

Creator: Williams, Francis H. (Francis Henry), 1852-1936; elected 1902

Image: <http://www.amacad.org/archive/images/008530.001.jpg>

Image: <http://www.amacad.org/archive/images/008530.008.jpg>

Folder 20 An Experimental Study of Some Magnetic Fields, 1931 June 15.

Details experiments designed to show impact of sound waves on magnetic fields, producing an electric current; includes 3 sheets of diagrams; includes transmittal note.

Creator: Williams, Francis H. (Francis Henry), 1852-1936; elected 1902

Folder 21 Reconstruction of Languages, [ca. 1888].

Advocates reformation of grammar and spelling in languages for ease of non-native speakers and children.

Creator: Williams, Henry W. (Henry Willard), 1821-1895; elected 1866

Folder 26 [Essays: 1.) Observations upon the Horizontal Windmill 2.) Description of a Machine for threshing Grain 3.) On Polar and Equatorial Gravity].

Presumes the criticisms of Mr. Smeaton on the Horizontal Windmill were made before improvements described and illustrated. Describes and illustrates the means by which a machine threshes grain. Contradicts the idea that the difference between the polar and equatorial gravity is due to the poles being nearer to the center of the earth.

Image: <http://www.amacad.org/archive/images/008757.023.jpg>

Folder 27 [Footnote referencing works of La Lande and La Place].

Cites La Lande and La Place as sources used for measure of ellipticity in “observed lengths of pendulums in different latitudes”.

Image: <http://www.amacad.org/archive/images/008760.001.jpg>

Folder 28 [Observations of an Eclipse], [after June 1806].

Comments on the collected observations made at Falmouth, Woods Hole, Martha's Vineyard, Salem, and Rutland of an eclipse.

Note: Incomplete, pages 5-8 only.

Image: <http://www.amacad.org/archive/images/008765.001.jpg>

Image: <http://www.amacad.org/archive/images/008765.002.jpg>

Image: <http://www.amacad.org/archive/images/008795.004.jpg>

Folder 32 [Replies of G. P. Bond to interrogatories], 1859.

Discusses “mean solar time, or apparent solar time”; inserts responses after prepared questions.

Note: Title taken from docketing in back.

Image: <http://www.amacad.org/archive/images/008805.001.jpg>

Image: <http://www.amacad.org/archive/images/008805.002.jpg>

Folder 33 Tabular View of the Substances which constitute the Mineral Soil of the Environs of Boston.

Into two separate groups, organizes simple and aggregate minerals, with further classification in each.

Creator:

Note: Aggregate minerals correspond to those in Godon Silvain's "Mineralogical Observations: Made in the Environs of Boston, in the years 1807 & 1808". Furthermore, The General Repository and Review, Vol. 2, published by William Hilliard (1812) report of the communication notes an accompanying Tabular View and the misspelling of garnet as 'Garnat' there.

Image: <http://www.amacad.org/archive/images/008840.001.jpg>

Folder 34 Explanation of Dighton Rock.

Posits the inscription on Dighton Rock represents peace treaty. Bases explanation on the similarity to the Hebrew alphabet used by Phoenicians; includes table of comparison and enhanced illustration.

Note: Seems to reference reduced scale copy by Winthrop, as published in memoirs. Numbers in explanation correspond to those of Winthrop's drawing of the inscription on Dighton Rock.
