AMERICAN ACADEMY OF ARTS AND SCIENCES ARCHIVES

Series I-B-1: General records. Letterbooks. Bound letterbooks. Volume 14, 1909-1911

ADMINISTRATIVE INFORMATION

Historical Note

The Academy has received letters, announcements, and other forms of correspondence since the founding in 1780. All such correspondence was the responsibility of the Corresponding Secretary, one of the original officers of the Academy. Beginning sometime in the late 1800s, incoming letters were pasted into bound scrapbooks, which the Academy referred to as "letterbooks." This practice continued until 1988, when staff began saving correspondence in folders.

For the time period covered by Volume 14, the President of the Academy was John Trowbridge (1908-1915). The Corresponding Secretary was Edwin Herbert Hall (1904-1915).

Scope and Content

The series of letterbooks in its entirety includes letters from newly-elected Fellows, formally accepting their elections; communications with other learned societies (especially, invitations to attend meetings or send representatives to official events, and offers to exchange publications); correspondence concerning gifts of books, maps, and natural history specimens; and inquiries from members and non-members regarding the submission and publication of articles.

Volume 14 contains letters and other documents received by the American Academy from 1909 to 1911. The majority of this incoming correspondence pertains to the election, resignation, and death of members, most notably Woodrow Wilson's letter acknowledging election to the Academy prior to his taking office as President of the United States in 1913. Other topics, of lesser number, include notices of member deaths, circulars from national and international scientific societies and institutions, announcements of international congresses and invitations to various institutional anniversaries. A significant portion of this type concerns international scientific congresses and events, preparations for the Boston-1915 Exposition, President Howard Taft's medal ceremony in recognition of Orville and Wilbur Wright's discovery of flight, and requests for nominations for Nobel prizes in physics, chemistry, and literature. Some correspondence pertains to the financial and administrative activities of the Academy, particularly one member's reminiscence of past meetings on the anniversary of the Academy's one thousandth, as well as the activities of other learned societies, such as the American

Philosophical Society and the Amerika-Institut in Berlin, Germany.

Volume

1 volume contained within 3 document cases, Boxes 0288.2, 0288.3, and 0288.4
(0.75 linear feet)

Archival Arrangement

The Academy has begun disbinding the volumes and conserving the individual letters, and will continue that practice until all letters are in stable condition. The letterbooks in Series I-B are arranged numerically by volume number. Within each volume, the original order of the pages has been retained. Generally the records are arranged in chronological order. Multiple unrelated documents on one support page are labeled *a*, *b*; enclosures or envelopes are labeled *e*.
