

Foreword

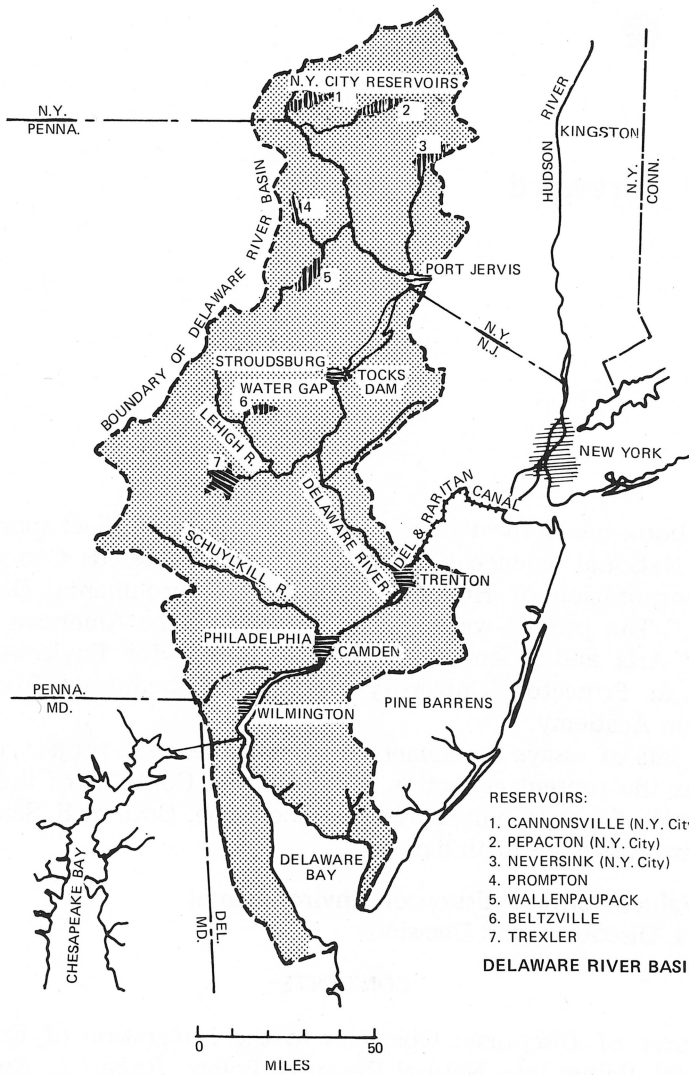

This book has derived from a two-year research project sponsored by the National Science Foundation, "Research Needs Concerning the Incorporation of Human Values into Environmental Decision Making." The project was organized jointly by the American Academy of Arts and Sciences and by the Center for Environmental Studies at Princeton University through a subcontract from the American Academy.

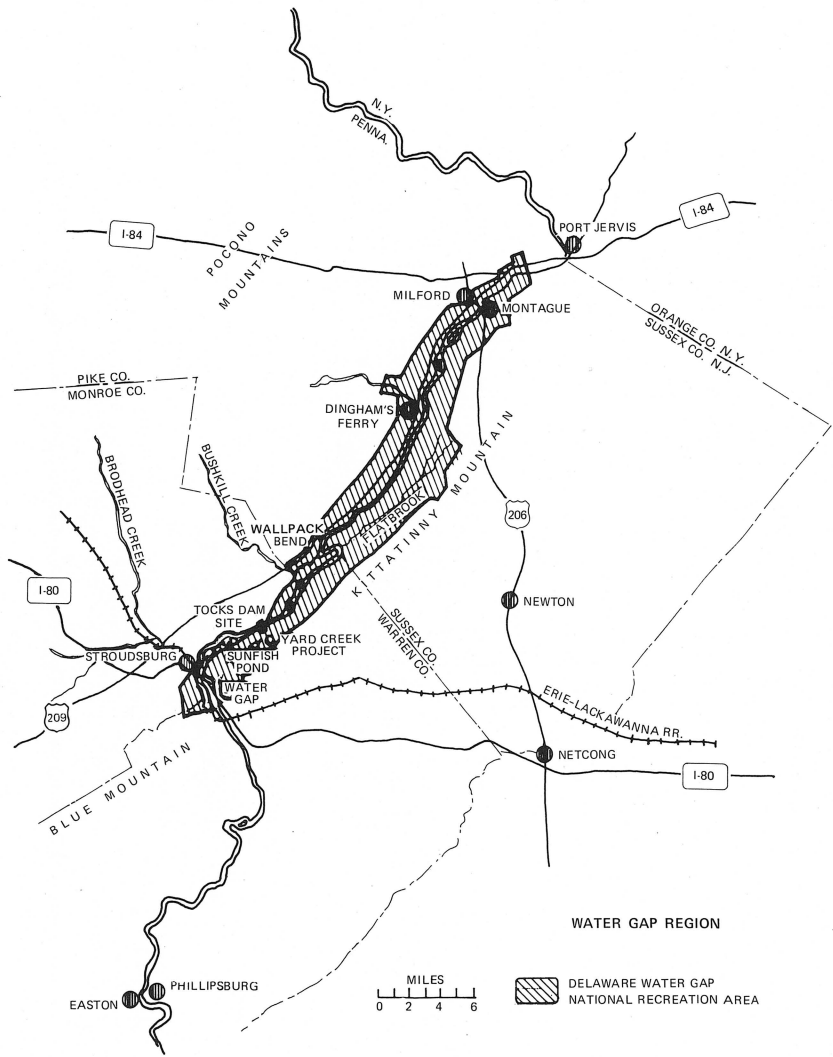

Two sets of essays have emerged from the research project, one of which is the present collection. The Table of Contents of the companion set of essays, edited by Laurence Tribe, Corinne S. Schelling and John Voss is set forth here.

When Values Conflict: Essays on Environmental Analysis, Discourse, and Decision

CONTENTS

1. Failures of Discourse: Obstacles to the Integration of Environmental Values into Natural Resource Policy, *Robert H. Socolow*
2. The Tocks Island Dam Controversy, *Irene Taviss Thomson*
3. Ways Not to Think About Plastic Trees, *Laurence H. Tribe*
4. The Rights of Nature, *Charles Frankel*
5. Environmental Decision Making: Analysis and Values, *Harvey Brooks*
6. Policy Analysis as Heuristic Aid: The Design of Means, Ends, and Institutions, *Henry S. Rowen*
7. An Afterword: Humane Values and Environmental Decisions, *Robert Dorfman*
