61 List of Staff at the Academy
This has been an extraordinary year, marked by a historic pandemic, bitter political strife, and unsettling civil unrest, and capped by a presidential election unlike any before. The new administration faces daunting challenges – uniting a deeply divided country, marshaling science and public health expertise to quell the coronavirus pandemic, improving relationships with international allies, striving for racial equity, addressing climate change, and making our economy work for all citizens. Members of the American Academy will play important roles in these efforts, both through public service and through the work of our organization. I believe we are as relevant and important now as at any other moment over the past two hundred and forty years.

The Academy is distinguished by its capacity to convene scholars, practitioners, and public figures from every discipline, field, and profession to define the most important problems facing our world and develop new ideas to solve them. Over the past year I’ve been struck by how often the Academy has anticipated issues before they became urgent. I’ll offer some examples. A Stated Meeting in 2006 presaged the pandemic we are living through now in uncanny detail, warning that it was only a matter of time. Our recent project on The Public Face of Science explored nuances of the public’s trust in science and scientists, providing insight that helps us understand how that trust can be influenced by politics. And Our Common Purpose, the final report from our Commission on the Practice of Democratic Citizenship, offered much needed recommendations to help mend fissures and strengthen our democracy.

It is a great honor to be elected to the Academy and we should take pride in its contributions. But this year, as killings of innocent citizens by police once again cast a spotlight on unjust experiences of Black Americans, we took a hard look at ourselves. The Academy’s Board had frank and open discussions about the anti-Black racism that is endemic in our country. We acknowledged that it is also intrinsic to our history as an organization. We contemplated how it conflicts with our values and how it should be countered in our work. In September, the Board released a formal Statement on Anti-Racism, found on pages 6–7 in this Annual Report. We stand behind that Statement, and owe Board colleagues K. Anthony Appiah, Deborah Rutter, and Natasha Trethewey a debt of gratitude for crafting powerful language to express our commitment.

In the Statement we say, “We accept that the Academy like the nation has much to atone for. A statement, of course, barely atones for anything. Acting upon it is what will.” We will be accountable for taking action and making changes to erase the influence of racism in selecting our members and operating our organization. We will be deliberate in considering how racism shades each problem and project we take on, and we will instill an anti-racism perspective in our work. I am pleased that K. Anthony Appiah has agreed to serve as Chair of a new Standing Committee on Anti-Racism, working with myself, President David Oxtoby, and distinguished thought leaders to recommend actions and keep us on task. You will hear more about this Committee and its work in the months to come.

The year 2020 has been difficult, but our organization gives me hope for the future. The Academy has navigated through troubling times in the past. As we have since our earliest days, we will draw on the ingenuity and dedication of our members to chart a course for a better future. With your leadership, involvement, and support, I am confident that the Academy will continue to make important contributions for the benefit of generations to come.
As we reach the end of a year like no other, I hope this message finds you well and safe. As you know, the COVID-19 pandemic has affected every aspect of the Academy’s work. Our staff has been working remotely since the middle of March 2020 and will continue to do so until at least July 2021. We have had to adapt quickly to a year in which we have become a truly “virtual” community. And yet, this was a year that also demonstrated the enduring strength of that community.

A series of online events has allowed us to include more members – in more places – than ever before, a lesson we will take with us when we reach the “new normal.” Through weekly Zoom all-staff meetings and virtual social events, our staff has maintained the close bonds that so impressed me when I first arrived at the Academy. And our virtual 2020 New Member Celebration on October 7, while certainly no substitute for Induction, succeeded in conveying the sense of fellowship, intellectual curiosity, and public purpose that makes the Academy such a special institution.

While the COVID-19 crisis has fundamentally changed how the Academy pursues its work, another crisis has inspired us to reconsider why.

As our Board Chair Nancy Andrews notes in her message in this Annual Report, the recent incidents of police violence and ensuing protests for racial justice have led us to reflect on the role the Academy plays in our society. As a workplace, we have come together through candid all-staff discussions, special virtual staff events, and a new Diversity and Inclusion Council to engage in a meaningful dialogue about what we can do – as individuals and as an organization – to build a more hopeful future. Three Board members – Anthony Appiah, Deborah Rutter, and Natasha Trethewey – demonstrated superb leadership in developing an Academy Statement on Anti-Racism, which was approved by the Board and is available on the Academy’s website and on the following pages. To ensure that this statement is translated into action, we have established a Board Standing Committee on Anti-Racism, focused on strengthening the diversity of our membership and leadership, making sure that the Academy holds up the values of anti-racism as an employer, and ensuring that a commitment to anti-racism is reflected in our work.

This renewed commitment to building a more just society is already evident in the projects and publications detailed in this Annual Report. In June, the Academy released Our Common Purpose: Reinventing American Democracy for the 21st Century, the final report of the Commission on the Practice of Democratic Citizenship. Over the course of two years, the Commission conducted listening sessions with hundreds of Americans in communities across the country, developing a set of 31 recommendations to help make American democracy more representative, responsive, and just. In September, the Academy’s Making Justice Accessible project released Civil Justice for All, providing concrete recommendations to improve access to civil legal assistance for the millions of low-income Americans who need it. And projects such as The Public Face of Science, Challenges for International Scientific Partnerships, and New Models for U.S. Science and Technology Policy released reports emphasizing the importance of inclusion to the strength, vitality, and competitiveness of the scientific enterprise.

The Academy was born of crisis, established by the nation’s founders in 1780 amidst the American Revolution. Let us likewise make the current crisis a time of rebirth for the Academy. I hope you will join us as we confront the challenges of our time and bring new meaning to our founders’ promise of service to a “free, independent, and virtuous people.”
For the third time in our long history as an independent republic – the Civil War, the Civil Rights movement, and now this movement of civil unrest – we see the possibility of real progress in escaping the long shadow of White Supremacy in our country that dates back to its beginnings. The Academy was founded, as was our nation, during the Enlightenment, a moment in which prominent thinkers and philosophers – including Thomas Jefferson – codified notions of racial difference and hierarchy, the bedrock of White Supremacy and racism. These ideas, intrinsic in our national story, are embedded in our institutional history as well, and we certainly cannot advance if we refuse to have frank conversations about the past and the present of racism in our country.

We are proud of the Academy’s long history of gathering together leaders in every domain of American life and thought in service to the common good. We are proud, too, of all that is best in the traditions of our country, beginning with its bold enunciation that we are all created equal, all endowed with the same inalienable rights. But the price of taking pride in the genuine achievements of a historical institution like ours, as in our nation, is that we must accept the burden of its less honorable traditions. We repeat: We have no difficulty in being proud of the Academy’s achievements. That pride can and should guide us. But our shame should guide us, too, driving us to work to eradicate the practices and reform the institutions whose behavior is the ground of that shame. To ignore the shame would be to get our pride on the cheap.

If we are to make the best of the current opportunities for progress, we must begin, therefore, with a frank acknowledgment of the sources of our shame. The universities and colleges that educated our earliest members excluded African Americans. With honorable exceptions, many of our universities made their first real attempts to recruit significant numbers of Black people only in the 1960s, when our most ancient universities were more than three centuries old. Like the country’s first President, the Academy’s founding President, James Bowdoin, was a slaveholder in 1776, when he sided with that revolution in the name of freedom. We cannot excuse him by saying he merely thought with his times. Even Thomas Jefferson recognized, in his draft of the Declaration, that the slave trade violated “the most sacred rights of life and liberty” of Africans. Nor was Bowdoin, of
course, the last racist among our members, as Jefferson was not the last of our racist Presidents. The Academy’s historical treatment of women is also replete with sources of shame.

We can be proud that Dr. Ralph Bunche, an African-American international civil servant of the first rank, was elected to the Academy in 1951, the year after he received the Nobel Peace Prize. But equally we must be ashamed that no African American – in the country of W.E.B. Du Bois and Zora Neale Hurston – was elected before him.

The fact is that every major feature of our social lives is shaped by massive continuing racial inequalities, as we have seen, yet again, in the current pandemic. Embedded as we are in this history, we have choices to make about how to play a role in combatting the continuing institutionalization of Black racial disadvantage.

Shame is not guilt. We do not have responsibility for the Academy’s past wrongs. But we do accept that we ourselves have not done as much as we should have. Our primary responsibility, though, as leaders of the institution, moving forward, as custodians of the commitment to our common good, is to seek to undo the wrongs and to move us forward in the search for racial justice, advancing the ongoing project of perfecting our Union.

We believe this means at least three things. First, we must make sure that our membership and our leadership are fully reflective of the racial diversity of American excellence. Second, in all of our projects in service to the common good, we must keep our eyes firmly on ensuring that we lose no opportunities to contribute to undoing the unjust legacies of racism. In that task, the formidable intellectual resources of the Academy can be placed in the service of deeper social understanding. And third, we must be rigorously committed to ensuring that nothing we do as an employer continues the legacies of White Supremacy. We recognize, of course, that anti-racism is not the only thing that matters. But we believe it must now be one mainspring of our work. As a result, the Chair of the Board has created a new Standing Committee of the Academy on Anti-Racism that will be responsible for advising the governing boards in our pursuit of these goals.

We accept that the Academy like the nation has much to atone for. A statement, of course, barely atones for anything. Acting on it is what will. We expect the members of the Academy and the wider world to hold us to these commitments. You can expect to hear more of the Academy’s work on these three fronts in the months and years ahead.

GOVERNANCE & COMMITTEES, 2020–2021
Report of the Treasurer

CARL H. PFORZHEIMER III

The firm of Mayer Hoffman McCann P.C., Certified Public Accountants, conducted the audit of the American Academy’s statements of financial position for the fiscal year 2020 (July 1, 2019–June 30, 2020). I am pleased to report the auditors found the consolidated financial statements present fairly, in all material respects, the financial position of the Academy, and the auditors have issued an unqualified report. The consolidated statement of activities and financial position may be found on pages 12–13. A copy of the audited financial statements is available on the Academy’s website and upon request from the Academy’s Business Office.

In spite of the challenges associated with the COVID-19 pandemic, the financial stability of the Academy continues to be strong due to the generous financial support from members, foundations, and affiliates. For the fiscal year 2020, total assets decreased by less than 0.8 percent, from $86.5 million to $85.8 million. Total liabilities decreased from $3.2 million to $3.1 million. The operating budget was maintained at an approximate break-even level as in years past.

As of June 30, 2020, the investment portfolio had a fair market value of $67.4 million, a decrease of $3.4 million for the year as a result of a declining market and the release of purpose restricted funds, such as grants and prior gifts. The Investment Committee continues to review and make recommendations related to the Academy’s investment goals, asset allocation, and performance objectives by which the organization’s assets are managed.

I would like to thank the members of the Audit Committee, Investment Committee, and Finance Committee for stewarding the Academy’s resources.

Members of the Audit Committee include Larry J. Shapiro (Chair), Richard E. Cavanagh, William F. Pounds, and Patti B. Saris.

Members of the Investment Committee include Arthur Gelb (Chair), Nancy C. Andrews, Ernest Cockrell, Alan M. Dachs, D. Ronald Daniel, Martin Leibowitz, David W. Oxtoby, Carl H. Pforzheimer III, and David C. Weinstein.

Members of the Finance Committee include Carl H. Pforzheimer III (Chair), Nancy C. Andrews, Alan M. Dachs, Arthur L. Goldstein, Cherry A. Murray, Venkatesh Narayanamurti, David W. Oxtoby, James M. Stone, and Pauline Yu.

On behalf of the Development and Communications Committee, I would like to extend my deep gratitude to all the Fellows, friends, and foundations who supported the Academy this year.

It was a year marked with uncertainty in the philanthropic world, as the pandemic and other factors caused some donors and funders to reconsider when and how to give. The Academy, like many other nonprofits, was adversely impacted. However, despite these challenges, the commitment and generosity of our community persisted. The Academy received over $9.2 million in new gifts and grants during the 2020 fiscal year. This total included over $2 million in contributions to the annual fund—the first time in our history that we have surpassed this milestone.

I would like to acknowledge the major donors and foundations whose contributions helped to advance critical and timely Academy projects, such as the Commission on the Practice of Democratic Citizenship and Meeting the Challenges of the New Nuclear Age, and explorations of a study on climate action in the United States. These include the S. D. Bechtel, Jr. Foundation, Alan and Lauren Dachs, the Raymond Frankel Foundation, the Hellman Foundation, Robert Higgins, the Andrew W. Mellon Foundation, the Rockefeller Brothers Fund, Kenneth and Susan Wallach, and Hansjörg Wyss, a new member who made a remarkable gift of $1 million to support the most pressing needs of the Academy.

These gifts also are counted as part of the Campaign for the Academy and Its Future, which has now raised over $66 million toward its $100 million goal. The Campaign seeks to change the way that philanthropy supports the Academy, bringing greater continuity and sustainability to our programs by increasing endowed and multiyear support. If successful, this change will undergird the Academy through challenging years such as this one, allowing our work to progress unhindered and to have its intended impact. As cochairs, David Rubenstein and I are grateful to all those who have added their support, and we are committed to achieving a successful outcome to the campaign by 2022.

Finally, I would like to thank the members of the Development and Communications Committee for their insight, ideas, and guidance that have aided our fundraising efforts for many years. Going forward, the work of development will be folded into the Trust, an adjustment that is sure to bring greater efficiency to discussions about philanthropic support, visibility, influence, and impact. It has been a great pleasure to work with this distinguished group of volunteers. We are fortunate to have their continued involvement in many aspects of the Academy’s governance, membership, and projects.
The Committee on Studies and Publications supports the Academy’s Council by regularly reviewing the progress of projects, considering topics for future studies, and evaluating publications, including *Dædalus*.

Academy members from a broad range of disciplines and professions share their expertise on projects and publications, which look at critical issues, advance discussion on central questions, and offer solutions to both national and international challenges.

During 2020, two senior program staff members joined the Academy team. In September, Islam Qasem started as the John E. Bryson Director of Science, Engineering, and Technology Programs and Program Director for Global Security and International Affairs to oversee the project work within those portfolios. Tania Munz started in February as the new Chief Program Officer. In this capacity, she leads the coordination and integration of the Academy’s programmatic work within the five areas of emphasis:

- American Institutions, Society, and the Public Good
- Education and the Development of Knowledge
- Global Security and International Affairs
- The Humanities, Arts, and Culture
- Science, Engineering, and Technology.

An overview of the active projects and a list of recent Academy publications may be found on pages 17 – 38.

During 2020, the Committee recommended four project proposals to the Council and the Board of Directors and approved four *Dædalus* proposals. The projects are:

- **Accelerating Climate Action** – Cochair: Christopher Field (Stanford Woods Institute for the Environment, Stanford University). Additional cochairs to be named.

  The scientific consensus is clear: climate change is upon us, and its impacts will be devastating and increasingly difficult to prevent and address if we do not act now. This project will attempt to answer the following questions: Why has meaningful action in the United States on this critical issue stalled, despite strong scientific backing across the international scientific community? What factors and policies have permitted an unjust distribution of the impacts of climate change, in which lingering repercussions of structural racism are, and will continue to be, exacerbated by the climate crisis? And how can the United States accelerate positive trends on climate action and work to reach zero emissions by the middle of the twenty-first century?

- **The American Dream: Planning Phase** – Cochairs to be determined.

  An intensive twelve-month planning period is being undertaken to develop this major new initiative. This project will address how surging inequality and declining rates of social mobility have, for many Americans, bred deep distrust of economic and political institutions. The American Dream project will build on and complement the Academy’s Commission on the Practice of Democratic Citizenship.
Rethinking the Humanitarian Health Response to Violent Conflict (approval of updated focus) – Co-chairs: Paul Wise (Stanford University School of Medicine); Jennifer Welsh (McGill University; Somerville College, University of Oxford); and Jaime Sepulveda (University of California, San Francisco).

The fundamental goal of this initiative to confront the current crisis in humanitarian protection and the provision of health services in areas plagued by armed conflict remains central to this study. However, recent events surrounding the COVID-19 pandemic have elevated the utility and urgency of some of the initiative’s core components. The revised study will focus on two broad areas of emphasis: global cooperation and pandemic control; and regional humanitarian responses to pandemics, criminal and political violence, and forced migration. In response, the initiative will prioritize activities that focus more directly on these components and initiate scholarly work with the greatest promise of making critical, strategic contributions.

Coming out of a series of COVID-19–focused sounding meetings, this project will examine how our current systems of essential industries, services, and workers can be better assessed and reconfigured to ensure long-term resilience and sustainability in the face of the current and possible future health crises.

The four Dædalus proposals that were approved are:

- “Reimagining Justice: The Challenges of Violence and Punitive Excess,” guest edited by Bruce Western (Columbia University). This issue of Dædalus will bring together essays that look at violence and justice reform as well as criminalization and punitive excess. The volume will address the major challenges to the task of foundational criminal justice reform in the United States.

- “Institutions, Experts, and the Loss of Trust,” guest edited by Henry E. Brady (University of California, Berkeley) and Kay Lehman Schlozman (Boston College). The collection will explore the extent and consequences of the erosion of trust. One central theme will be the interplay between the decline in trust and the way that distrust adheres to multiple lines of political and social cleavage.

- “The Humanities in American Life: Thriving or in Crisis?” guest edited by Norman Bradburn (University of Chicago, Emeritus), Carin Berkowitz (New Jersey Humanities Council), and Robert B. Townsend (American Academy of Arts and Sciences). This volume of Dædalus will examine the value and state of the humanities in American society, with a focus on newer areas of academic humanistic inquiry, such as the medical, environmental, and digital humanities.

- “AI and Society,” guest edited by James Manyika (McKinsey Global Institute). The volume will explore where we are in the development of artificial intelligence, the applications and uses of AI, and key questions around the impact that AI could have on society and on our future. The essays will present both positive and critical views of AI, in its technical and scientific development and in its impacts on society.

The Committee on Studies and Publications invites members to suggest ideas for projects and for issues of Dædalus that draw on the knowledge and interests of the Academy’s membership and on the Academy’s ability to bring together individuals from diverse fields, disciplines, professions, and institutions.
Since its founding, projects that work to bolster Americans’ engagement with government institutions have been a hallmark of the American Academy of Arts and Sciences. Our charter states that the “end and design” of the American Academy is to “cultivate every art and science which may tend to advance the interest, honor, dignity, and happiness of a free, independent, and virtuous people.” Today, this effort involves projects designed to develop innovative solutions to problems facing American society in the twenty-first century. Projects in this area interpret the term “institutions” broadly, focusing on all of the constituent elements of government, civic culture, and civil society. These projects address how individual citizens interact with social structures, how these experiences prepare people to make a positive contribution to a diverse America, and how these institutions are evolving. The Academy shares this research through publications, convenings, and active outreach.

The Commission on the Practice of Democratic Citizenship is a multiyear project of the American Academy of Arts and Sciences. The Commission launched in 2018 to explore the factors that encourage and discourage people from becoming engaged in their communities. The Commission’s work sheds light on the mechanisms that help people connect across demographic and ideological boundaries; examines how the transformations in our media environment have altered what civic engagement looks like in many communities; and makes recommendations that will encourage participation and empower everyday citizens. The project uses a definition of “citizenship” that extends beyond simple legal status to include people who are “civic participants” in many domains within their communities.

The project seeks to improve democratic engagement in the United States with a set of recommendations that reach across political institutions, civic culture, and civil society to revitalize American democracy by increasing representation, empowering voters, making institutions more responsive, and revitalizing our civic culture. Our Common Purpose: Reinventing American Democracy for the 21st Century, the Commission’s final report, was released in June 2020 and the Commission will remain active in an effort to make significant progress on all of the recommendations by 2026, the nation’s 250th anniversary.
The two projects of the Making Justice Accessible initiative address the challenge of providing legal services to low-income Americans.

The first project, Designing Legal Services for the 21st Century, gathered information about the national need for improved legal access and advanced a set of clear national recommendations for closing the “civil justice gap” between supply of and demand for legal services. In September 2020, the project released its final report, *Civil Justice for All*, calling for the legal profession, the courts, law schools, tech professionals, and partners from many other fields to join together to provide legal assistance to many more people in need. The report recommends targeted investments, simplified procedures, greater coordination and new partnerships among a range of fields and sectors, and new advocates who are trained and encouraged to provide more accessible legal assistance.

The second project, Data Collection and Legal Services for Low-Income Americans, identifies the sources of existing data on legal services and unrepresented civil litigation nationwide. This project creates a blueprint for future data collection efforts, including establishing a research agenda for scholars, practitioners, and policymakers. Participants include representatives of the courts, legal aid providers, and foundations, as well as legal scholars and social scientists.

The related Winter 2019 issue of *Dædalus* on “Access to Justice” is a multidisciplinary study of the civil justice gap, examining new models for the delivery of legal aid.
Projects in the Education and the Development of Knowledge program area inform policy and practice in support of high-quality, lifetime educational opportunities for all Americans. The program area continues the Academy’s enduring focus on the vital role education and knowledge development play in our nation and in our world. From advancing equitable educational outcomes to leveraging new developments in the learning sciences and digital technologies to questioning how domestic and international scholarly work may be affected by advances in machine learning, the Education and the Development of Knowledge program area—through commissions, projects, convenings, and publications—draws upon scholars and practitioners from various fields and disciplines to explore the conditions that foster the creation, transfer, and preservation of knowledge in a global context.
The Commission on the Future of Undergraduate Education is a multiyear initiative charged with examining the current state of American undergraduate education, projecting the nation’s short-term and long-term educational needs, and offering recommendations to strengthen all aspects of undergraduate education. The Commission – whose members include leaders from higher education, philanthropy, business, and government – reviewed the research and data; met with students and faculty members, experts, and state and federal policy-makers; and produced a data-based primer on the student journey through college, four in-depth research papers, a comprehensive final report, and an issue of *Dædalus* on improving teaching.

The key idea emerging from this body of work is that what was once a challenge of quantity in American undergraduate education, of enrolling as many students as possible, is increasingly a challenge of educational quality – of making sure that all students receive the education they need to succeed, that they are able to complete the studies they begin, and that they can do all this affordably. The Commission engaged in a range of outreach activities to make its work as widely read as possible and to advance its recommendations around quality, completion, and affordability.
The Global Security and International Affairs program area draws on the expertise of policy-makers, practitioners, and scholars to foster knowledge and inform innovative and more substantial policies to address crucial issues affecting the global community. Projects underway in this area engage with pressing strategic, development, and moral questions that underpin relations among people, communities, and states worldwide. Each initiative embraces a broad conception of security as the interaction among human, national, and global security imperatives. Project recommendations move beyond the idea of security as the absence of war toward higher aspirations of collective peace, development, and justice.

The Civil Wars, Violence, and International Responses project stems from the observation that current multilateral approaches for preventing, mitigating, and resolving civil wars and intrastate violence are often far too ambitious. They frequently overpromise stability, security, peace, democracy, and development to countries experiencing high levels of violence and instability. The project identified six threats that emerge from civil wars and intrastate violence: pandemic diseases, transnational terrorism, migration, regional instability, great power conflict, and criminality.

The project has engaged in extensive domestic and international outreach to share findings and recommendations that deliver a more comprehensive, effective, and integrated approach to conflict prevention and crisis management, which encompasses security, diplomacy, and development strategies in countries such as Colombia, Nigeria, Ethiopia, Syria, Lebanon, and Sri Lanka, among others. Building on these policy discussions, the project published a research paper that focuses on the policy implications of the project’s findings, which will be distributed to relevant policy-makers in the United States and internationally.

PROJECT Meeting the Challenges of the New Nuclear Age, Phase One

The world has entered a new nuclear era. No longer dominated by two nuclear superpowers, the evolving multipolar nuclear order presents fundamental challenges to the conceptual and practical means of avoiding nuclear war. Moreover, the new era has slowly dismantled the bilateral arms control framework, with no clear prospect that it will be revived and extended. The possibility that a framework or frameworks encompassing other, let alone all, nuclear powers can be achieved seems even more remote. In addition, advances in weapons technology and the opening of new frontiers, such as cyber capabilities and artificial intelligence, make a shifting environment still more complex. The pathways to inadvertent nuclear war have multiplied across more regions and relationships.

Since 2017, the Meeting the Challenges of the New Nuclear Age project has worked to identify the major dangers generated by the dynamics of a multipolar nuclear world that pose the greatest threat of inadvertent nuclear war; offer alternative approaches to addressing each of these dangers; facilitate discussions with relevant communities in the United States and abroad; and encourage and assist policy-makers, Congress, the analytical community, and the media to think systematically about our increasingly multipolar world. The publications produced by the project have been shared widely with domestic and international policy-makers, scholars and students of nuclear affairs, and leaders of international organizations.

Meeting the Challenges of the New Nuclear Age is rooted in the critically important work on arms control that the Academy conducted from 1958 to 1960 to prevent a nuclear confrontation between the United States and the Soviet Union. During that time, Academy Fellows gathered monthly to build a cooperative framework between the United States and the Soviet Union based on the limitations of the nuclear stockpile and the establishment of mutual vulnerability between the two rivals. The group included Donald Brennan, Edward Teller, Henry Kissinger, and Thomas Schelling, among others. Today, more than ever, an effort that brings together scholars and policy-makers to examine the wide range of challenges posed by the changing nuclear order is urgently needed.
A World Without Nuclear Constraints: A Virtual Discussion Series

The last remaining bilateral nuclear arms treaty between the United States and the Russian Federation is set to expire on February 5, 2021. The New Strategic Arms Reduction Treaty (“New START”), negotiated in 2010, set forth strict, verifiable limits on the number of strategic missile launchers both nations can maintain. If the treaty expires, the world’s largest nuclear arsenals would not be subject to regulation or inspection for the first time since the middle of the Cold War.

With the number of nuclear weapons states increased to nine and the rapid advances in weapons technology further complicating the environment, it is a challenging time for nuclear arms control and, by implication, for global peace and security. The end of New START is part of a changing landscape: many other treaties governing nuclear weapons and related technologies have been abandoned or abrogated in the last twenty years.

As Robert Legvold and Christopher Chyba write in their introduction to the Spring 2020 issue of Daedalus on Meeting the Challenges of a New Nuclear Age, the “new era has slowly dismantled this bilateral arms control framework, with no clear prospect that it will be revived and extended.” To stimulate discussion about the changing multipolar nuclear order, in the summer of 2020, in collaboration with the Hoover Institution, the Academy convened a series of virtual discussions with experts and former officials from the United States, Russia, and China to identify and explore areas that could lead to greater international cooperation.

An essential question connected all the discussions: will we have a future with nuclear arms control or a future without it? The participants acknowledged the challenges of protecting American security interests in an unregulated nuclear world, recalling that the dawn of the “first” nuclear age – which lasted from the development and use of nuclear weapons in 1945 until the negotiation of the first arms control agreements beginning in 1970 – produced massive accumulations of nuclear arms, as well as countless crises, near-misses, and widespread global dangers. Polling research introduced by one participant showed that U.S. public support of nuclear deterrence combined with arms control and legal restraints remains strong along bipartisan lines, which prompted the question of how to elicit concern from U.S. policymakers to address the declining support in Congress for nuclear arms control.

Since the United States and Russia today control the majority of nuclear arms – over 6,000 weapons each, constituting over 90 percent of the global holdings – the participants focused not only on the current status of talks between the two countries, and the impediments to renewing New START, but also on understanding and forecasting what future negotiations might look like.

The final session in the series featured presentations by Russian and Chinese experts on the official priorities of their countries and the debates taking place in Moscow and Beijing. From one point of view, the discussions were encouraging because the United States, Russia, and China have the power to reduce significantly the role that nuclear weapons play in international affairs. Skillful diplomacy between the United States and Russia could extend the life of the New START agreement by five years, which would provide time to discuss and negotiate a successor agreement and allow for further reductions in the world’s two biggest nuclear arsenals and other measures to reduce nuclear dangers. Over time, talks on how to manage the new technologies could be extended to other nations with nuclear weapons, beginning with China.

An important outcome of the discussion series was the identification of a number of issues that might form the basis for official talks and provide avenues of future research and collaboration for the Academy’s nuclear program.

“...The Academy’s virtual meetings were a vivid reminder of the historic U.S.-Soviet negotiations with Mikhail Gorbachev during the time I was in office. That memory prompted me to say that I had seen the Promised Land – a world without nuclear weapons – at Reykjavik, so I know that it exists, but I also know how hard it will be to get there. — George P. Shultz
PROJECT Meeting the Challenges of the New Nuclear Age,
Phase Two: Deterrence & New Nuclear States

With the emergence of three new nuclear powers (India, Pakistan, and North Korea) and several more potentially becoming nuclear states (including Iran, Saudi Arabia, and Turkey), the world is on the verge of a new nuclear age. This will demand new thinking about the security implications of nuclear powers that may be in highly hostile environments, suffer from domestic instability, have fewer resources, or be led by personalist dictators. Phase Two of Meeting the Challenges of the New Nuclear Age investigates the deterrence and defense implications facing small nuclear force countries and potential proliferators.

The project is producing an edited volume of innovative, policy-relevant essays that will be published by a university press. Outreach activities will be aimed at nuclear policy-makers (primarily in the United States) and academic centers and think tank institutes with a specific focus on nuclear studies.

Rethinking the Humanitarian Health Response to Violent Conflict seeks to understand and address current trends in humanitarian contexts that pose new or evolving challenges for humanitarian health responders. Among the most pressing challenges are the increasingly protracted nature of civil and non-international armed conflict; the fact that many of the world’s most violent places are facing criminal or political violence rather than conflict as conventionally understood; shortfalls in funding; and changing geopolitical relations. This project brings together political scientists, legal and security experts, health professionals, and humanitarians to examine current challenges to effective humanitarian action and to develop, where necessary, new strategies for preventing civilian harm and delivering critical health services in areas plagued by violent conflict.

The project’s initial work will focus on two key priority areas. First, building on its efforts to address the political and security dimensions of pandemic response in areas of weak governance and violent conflict, the initiative will convene a series of rapid-cycle workshops on global cooperation and pandemic control. Drawing upon the Academy’s strengths in political science, diplomacy, global health, and the arts, the project will explore how political legitimacy, trust in expert authority and information, divisive political environments, and cultural mechanisms of community protection and social cohesion shape the ability of states and international institutions to respond to infectious outbreaks.

Second, to respond to the acute challenges that humanitarian organizations face in addressing health needs in areas with extreme levels of political or criminal violence – settings that now account for more violent deaths than war zones – and in places where people are fleeing from such violence, the project will convene interdisciplinary groups of experts from across multiple regions to explore the questions state sovereignty poses for humanitarians operating in such settings and to analyze and examine how the dynamics of political and criminal violence influence humanitarian responses.

FUNDERS
Louise Henry Bryson and John E. Bryson
Unlike the Cold War, the current nuclear age is characterized by a simultaneous collapse of arms control agreements and the absence of any strategic dialogue among the three main nuclear players, which would serve to minimize and reduce the potential risks of a nuclear escalation.

One strand of the project’s work consists of a series of bilateral U.S.-Russia and U.S.-China dialogues designed to identify critical short-term goals in arms control. The meetings will identify areas for cooperation and conceptual thinking about measures that might strengthen strategic stability and help to reduce the significant dangers of nuclear weapons being used in the future. Through reports and outreach activities, the project aims to contribute to rebuilding trust and predictability among the rival Great Powers.

A second strand of work will build on the Academy’s experience organizing educational sessions for the United States Congress on a range of topics, including cybersecurity, disaster response, and federal research policy in addition to nuclear issues. Through a series of engagements with members of Congress and their staff, the project will help to foster and strengthen knowledge on key issues and challenges facing the United States in arms control and international security, including renewal of the New START treaty and the dangers of a world without nuclear constraints.
Since 1780, the Academy has advocated for the importance of the humanities, arts, and culture in American society, and has called on both private citizens and the nation’s government to help foster advances in these areas. Today, the Academy conducts research and develops policy recommendations to advance the humanities in academic scholarship and in the public sector, to display the importance of the arts in society, and to enrich the nation’s cultural life. By bringing together scholars, artists, and leaders from both the public and private sectors, Academy programs in The Humanities, Arts, and Culture put practitioners and scholars in conversation with individuals from other disciplines, ensuring that the arts and humanities are valued in all areas of civic life. Projects in this area demonstrate the value of the arts, humanities, and culture to the nation’s security and prosperity, and call attention to the role played by work in these fields to enriching the health of communities and the daily lives of its citizens.

The Commission on the Arts seeks to reframe the national conversation about what role the arts can play in a diverse twenty-first-century democracy. The national focus of the project is reflected in the composition of its membership, which spans the cultural field and the geography of the United States; its members represent over a dozen states and more than forty organizations, disciplines, and institutions. This group of poets, scholars, institutional leaders, actors, and community advocates is guided by the common belief that the arts are essential to well-being. With this variety of perspectives, the Commission has been examining the funding mechanisms, policies, and narratives that currently govern the vast creative field.

Arts and culture are essential for their ability to bridge divides and foster community. The Commission seeks both to strengthen the impact and reach of creative work and encourage better support mechanisms for the artists and creatives whose labor and vision make that work possible. Through reports, recommendations, and public engagement initiatives—all set to launch in the summer of 2021—the Commission will offer a framework for how the arts can be better integrated and appreciated in public life. One report will identify the needs of artists as workers and outline a series of recommendations of federal and state policies that can provide long-term workforce development and job opportunities for cultural workers. A second report will highlight existing inequities in access and illustrate the effects that the absence or presence of the arts in a student’s formative years can have on the whole child’s development. In addition to these policy-oriented reports, the Commission is also producing an engagement initiative centered on broad participation from the American public. Each element seeks, within its given topic area, to uplift the necessity of art giving meaning to daily life, both personally and collectively.
The Humanities Indicators provide information about all aspects of the humanities: ranging from early childhood reading, through undergraduate and graduate education in the humanities, and on to employment and experiences later in life with museums and other humanistic activities. Now in its eleventh year as a publicly available website, the project tracks the condition of the humanities enterprise via its own rigorous survey research and analyses of data gathered by the federal government.

Recent work has included national surveys of humanities departments at four-year colleges and universities, as well as a survey of over five thousand Americans about their engagement with and attitudes about a variety of humanities activities. The Humanities Indicators are accessible at www.amacad.org/humanities-indicators.
Projects in Science, Engineering, and Technology seek to strengthen the capacity of science and engineering to improve the human condition. This goal has never been more important. Global challenges increasingly require collaboration across disciplinary, professional, and national boundaries, while advances in information processing and transmission raise issues for both the management of scientific and technical information and for the ability of individuals and institutions to assimilate and act on new discoveries.

Drawing on the expertise of its membership and outside experts, Academy studies in Science, Engineering, and Technology analyze the impact of advances in these areas and develop policy recommendations that are made available to government, academia, nongovernmental organizations, and the private sector. Activities focus on increasing public understanding of current research and technological change, and on helping society adapt effectively and make meaningful use of new scientific and technical knowledge. Areas of interest include U.S. productivity in science and engineering; public understanding of, and trust in, science; strengthening U.S. participation in international scientific collaboration; and climate change policy.

The Academy’s multiyear initiative on the Public Face of Science addresses various aspects of the complex and evolving relationship between scientists and the public and examines how trust in science is shaped by individual experiences, beliefs, and engagement with science. Additional project activities have included published work on the role of science in the legal system and the coordination and deployment of scientific teams as part of crisis response.

The initiative has brought together a broad range of experts in communication, law, humanities, the arts, journalism, public affairs, and the physical, social, and life sciences. While this project does not directly address scientific literacy in K-12 and adult education, it will inform such efforts by fostering a greater understanding of the public’s attitudes toward science.

The third and final project report of the initiative, entitled *The Public Face of Science in America: Priorities for the Future*, presents a series of proposed policy recommendations for target audiences to improve the practice of science communication and engagement. This report was informed by the findings of the earlier publications of the initiative, *Perceptions of Science in America* and *Encountering Science in America*, which aggregated data both on how Americans view the role of science in society and how they interact with science in their everyday lives.

The Academy study on Challenges for International Scientific Partnerships (CISP) examines impediments to collaborations between scientific researchers of all scales and identifies potential policy changes and best practices that could make the United States a better partner in international science partnerships. With guidance from its Steering Committee, the project pursues two major streams of work.

First, a working group on Large-Scale Science approaches international collaborations through the lens of issues particular to large-scale collaborations and not peer-to-peer or small-scale international work. This group has been tasked with exploring how the United States can enhance its role in these partnerships, both in physical facilities (e.g., the European Organization for Nuclear Research, or CERN) and distributed networks (e.g., the Human Cell Atlas). This group is developing a series of best practices and fundamental principles for these types of collaborations and will aim to articulate these to U.S. government agencies and congressional branches through a forthcoming report to better position the United States as a meaningful and engaged partner.

Through advice from the Steering Committee, the project has sought a second stream of work on U.S. collaborations with Emerging Science Partners. This working group is exploring issues particular to U.S. scientific collaborations, at all scales, with countries seeking to boost their scientific capacity, particularly those with limited resources to do so. The group prioritizes identifying and examining difficult issues facing resource-limited researchers, such as the challenges facing women researchers in the developing world, and will articulate a series of recommendations to aid in strengthening collaborations and making them more mutually beneficial.
This project assembled recognized leaders from all sectors of science, engineering, and technology to recommend policy actions to help ensure the long-term sustainability of the U.S. science and engineering research enterprise. Scientific and technological advances are fundamental to the prosperity, health, and security of America. Innovation and rapid integration of new knowledge and technologies emerge from investments in research and development and rely on the partnerships between universities, federal and state governments, and industry. Staying globally competitive will require a stronger partnership and a greater focus on long-term planning in scientific and engineering research.

The Restoring the Foundation report, published in 2014, offers actionable recommendations for the long-term sustainability of the U.S. science and engineering research system to ensure a healthy research enterprise that continues to benefit the American people. An update to the report, The Perils of Complacency: America at a Tipping Point in Science & Engineering, reaffirms the importance of science and engineering for the United States, especially in the context of China’s rise as a science and technology powerhouse.
The Academy seeks to launch a new Science, Engineering, and Technology initiative to focus on the current climate change situation facing our global society. The scientific consensus is clear: climate change is upon us, and its impacts will be devastating and increasingly difficult to prevent and address if we do not take action now. With such strong scientific backing across the international scientific community, what has prevented meaningful action?

The project will be developed around two key ideas, informed through a series of discussions held in the past year: 1) targeting U.S. audiences at various levels and 2) involving nontraditional disciplines in the project work, including social scientists, artists, and humanists.

The initiative will seek to further understanding of the barriers that prevent effective and collective action and propose strategies for how to overcome these barriers in order to make progress on moving productive conversations forward. It will also identify potential policies to propose to relevant U.S.-focused audiences to encourage the implementation of essential adaptation and mitigation strategies to build resiliency and prepare communities, especially those currently on the frontlines, for the inevitable climate future.

A Toast to New Members in Chicago*
Recent Prizes

EMERSON-THOREAU MEDAL
Margaret Atwood (Toronto, Canada) – 2019 recipient

TALCOTT PARSONS PRIZE
William Labov (University of Pennsylvania) – 2019 recipient

All Prizes

FRANCIS AMORY PRIZE
First awarded in 1940, this prize was established by a bequest made in 1912 by Francis Amory to recognize significant scientific advances in reproductive biology and medical care. Recipients of the Francis Amory Prize include Karl Sune Detlof Bergstroem, Eugene M. Bricker, Min Chueh Chang, Justin L. Cordonnier, Frederic B. Foley, David L. Garbers, Harry Goldblatt, Peter N. Goodfellow, Alexander Benjamin Gutman, Geoffrey Wingfield Harris, J. Hartwell Harrison, Charles Brenton Huggins, David M. Hume, Elwood Vernon Jensen, Willem Johan Kolff, Ernest Laqueur, Henry Lardy, Choh Hao Li, Robin H. Lovell-Badge, Mary Frances Lyon, Thaddeus R. R. Mann, Guy Frederic Marrian, Joseph Francis McCarthy, John P. Merrill, Barbara Jean Meyer, Benjamin F. Miller, Terence J. Millin, Beatrice Mintz, Carl Richard Moore, Joseph E. Murray, Warren O. Nelson, Susumu Ohno, David C. Page, George Nicholas Papanicolaou, Eugene F. Poutasse, George W. Thorn, Hans Henriksen Ussing, Selman Abraham Waksman, Frederick J. Wallace, Patrick C. Walsh, Lawson Wilkins, Howard Guy Williams-Ashman, Jean D. Wilson, and Hugh Hampton Young.

AWARD FOR EXCELLENCE IN PUBLIC POLICY AND PUBLIC AFFAIRS
Established in 2018, this award is presented to individuals for their distinction, independence, effectiveness, and work on behalf of the common good. The inaugural recipient of the Award for Excellence in Public Policy and Public Affairs is Ernest J. Moniz.

DISTINGUISHED LEADERSHIP AWARD
First awarded in 2016, the Distinguished Leadership Award recognizes individuals who exemplify a legacy of leadership and dedication to the founding ideals of the American Academy. Recipients of the Distinguished Leadership Award include Jonathan F. Fanton, Jerrold Meinwald, and Don M. Randel.
EMERSON-THOREAU MEDAL

The Emerson-Thoreau Medal was established in 1958 to give special recognition to distinguished achievement in the broad field of literature. The prize is awarded to a person for his or her total literary achievement rather than for a specific work. Recipients of the Emerson-Thoreau Medal include Hannah Arendt, Saul Bellow, Henry Beston, Mark Van Doren, Thomas Stearns Eliot, James T. Farrell, Robert Frost, Joseph Wood Krutch, Norman Mailer, Samuel Eliot Morison, Toni Morrison, Lewis Mumford, Katherine Anne Porter, John Crowe Ransom, I. A. Richards, Philip Roth, Robert Penn Warren, and Edmund Wilson. The recipient of the 2019 Emerson-Thoreau Medal is Margaret Atwood.

FOUNDERS AWARD

Established in 2005 on the occasion of the 225th anniversary of the Academy’s founding, this award honors individuals and institutions that have advanced the ideals of the Founders of the Academy. Recipients embody the spirit of the Founders: a commitment to intellectual inquiry, leadership, and active engagement. Recipients of the Founders Award include Robert J. Birgeneau, John H. Bryan, Richard J. Franke, John L. Hennessy, George Lucas, Jack Peltason, and Don M. Randel.

DON M. RANDEL AWARD FOR HUMANISTIC STUDIES

The Award for Humanistic Studies was established in 1975 by the Council of the Academy to acknowledge superior humanistic scholarship and raise its visibility with the general reading public. The award was renamed in 2017 in honor of musicologist and former Chair of the Academy’s Board of Directors Don M. Randel. The award complements the Emerson-Thoreau Medal for achievement in literature. Recipients of the Award for Humanistic Studies include Meyer Abrams, Kenneth Burke, Denis Donoghue, Martha Craven Nussbaum, Helen Vendler, and Jean-Pierre Vernant.

RUMFORD PRIZE

SARTON AWARD FOR POETRY

Presented for the first time in 2008, the Sarton Award for Poetry recognizes emerging poets of exceptional promise and distinguished achievement. It was established by a fund created by Academy Fellow May Sarton, a poet, novelist, and teacher who encouraged the work of young poets during her lifetime. Recipients of the Sarton Award for Poetry include Arda Collins, Matthew Dickman, Dawn Lundy Martin, Meghan O’Rourke, Vanesha Pravin, and Matthew Zapruder.

SARTON PRIZE FOR THE HISTORY OF SCIENCE

Presented for the first time in 1999, the Sarton Prize for the History of Science recognizes early-career historians of science whose work demonstrates exceptional promise. It was established by a fund created by Academy Fellow May Sarton to honor the memory of her father, Academy Fellow George Sarton, a preeminent leader in the field of history of science. Recipients of the Sarton Prize for the History of Science include Melinda Baldwin, Jenny Bulstrode, and Cristina Chimisso.

SCHOLAR-PATRIOT AWARD

This award, established in 2000, recognizes the extraordinary contributions of individuals who share the commitment of the Academy’s Founders, a group of patriots who devoted their lives to promoting the arts and sciences in service to the nation. Recipients of the Scholar-Patriot Award include Leo L. Beranek, Louis W. Cabot, William T. Golden, Edward M. Kennedy, Yo-Yo Ma, and Morton L. Mandel.

TALCOTT PARSONS PRIZE

First awarded in 1974, this prize was established to honor the noted sociologist and former president of the Academy. It is awarded for contributions to the social sciences, broadly defined. Recipients of the Talcott Parsons Prize include Daniel Bell, Robert Dahl, Clifford Geertz, Joseph H. Greenberg, Albert Hirschman, Daniel Kahneman, Robert K. Merton, Joan Wallach Scott, William Julius Wilson, and C. Vann Woodward. The recipient of the 2019 Talcott Parsons Prize is William Labov.
Members Elected in 2020, by Class & Section

A list of all active Members, arranged by Class and Section, Affiliation, or Year of Election, is available on the Academy’s website at www.amacad.org/directory. IHM designates an International Honorary Member.

MEMBERS ELECTED IN 2020, BY CLASS & SECTION

Class II
Biological Sciences

SECTION 1: Biochemistry, Biophysics, and Molecular Biology
Chang, Howard
Stanford University
Collins, Kathleen
University of California, Berkeley
Dejean, Anne (IHM)
Institut Pasteur, France
Emerson, Beverly
Oregon Health & Science University
Hill, Christopher
University of Utah School of Medicine
Hochschild, Ann
Harvard Medical School
Muir, Tom
Princeton University
Stark, George
Cleveland Clinic
Wallace, Susan
University of Vermont

SECTION 3: Neurosciences
Lipscombe, Diane
Brown University
Mooney, Richard
Duke University School of Medicine
Patapoutian, Ardem
Scripps Research Institute
Raman, Indira
Northwestern University
Steel, Karen (IHM)
King’s College London, United Kingdom
Wang, Fan
Duke University
Woolf, Clifford
Harvard Medical School

SECTION 4: Evolution and Ecology
Andrade, Maydianne (IHM)
University of Toronto Scarborough, Canada
Bergelson, Joy
University of Chicago
Cavender-Bares, Jeannine
University of Minnesota
Chown, Steven (IHM)
Monash University, Australia
Collins, James
Arizona State University
Eguiarte Fruns, Luis (IHM)
Universidad Nacional Autónoma de México, Mexico
Elena Fito, Santiago (IHM)
Consejo Superior de Investigaciones Científicas, Spain

SECTION 5: Medical Sciences
Armstrong, Katrina
Massachusetts General Hospital
Barry, Michele
Stanford University School of Medicine
Fuentes-Afflick, Elena
University of California, San Francisco
Kaelin, William
Harvard Medical School
Mukwege, Denis (IHM)
Panzi Hospital, Democratic Republic of the Congo
Qiao, Jie (IHM)
Peking University Third Hospital, China
Sheffield, Val
University of Iowa Carver College of Medicine
Siliciano, Robert
Johns Hopkins University School of Medicine
Woodruff, Teresa
Northwestern University Feinberg School of Medicine

SECTION 6: Microbiology and Immunology
Belkaid, Yasmine
National Institutes of Health
Damania, Blossom
University of North Carolina at Chapel Hill
Guillemin, Karen
University of Oregon
Hatfull, Graham
University of Pittsburgh
Heitman, Joseph
Duke University School of Medicine
Lovett, Susan
Brandeis University
Orphan, Victoria
California Institute of Technology
Overbaugh, Julie
Fred Hutchinson Cancer Research Center
Segre, Julie
National Institutes of Health
Wellens, Thomas
National Institutes of Health

Class III
Social and Behavioral Sciences

SECTION 1: Psychological Sciences
Chen, Edith
Northwestern University
Dawson, Geraldine
Duke University
Keltner, Dacher
University of California, Berkeley
Murphy, Gregory
New York University
Pollak, Seth
University of Wisconsin-Madison
Rajaram, Suparna
Stony Brook University

Richeson, Jennifer
Yale University

Tenenbaum, Joshua
Massachusetts Institute of Technology

SECTION 2: Economics

Abraham, Katharine
University of Maryland

Chiappori, Pierre-André
Columbia University

Donaldson, Dave
Massachusetts Institute of Technology

Forges, Françoise (IHM)
Université Paris-Dauphine, France

Hoxby, Caroline
Stanford University

Kranton, Rachel
Duke University

Miguel, Edward
University of California, Berkeley

Sotomayor, Marilda Antonia de Oliveira (IHM)
University of São Paulo, Brazil

Yariv, Leeat
Princeton University

SECTION 3: Political Science

Boone, Catherine
London School of Economics and Political Science, United Kingdom

Howell, William
University of Chicago

Jamal, Amaney
Princeton University

Jones, Bryan
University of Texas at Austin

Mares, Isabela
Yale University

Scheve, Kenneth
Stanford University

Soskice, David (IHM)
London School of Economics and Political Science, United Kingdom

Vavreck, Lynn
University of California, Los Angeles

SECTION 4: Law

Barron, David
United States Court of Appeals for the First Circuit

Feeley, Malcolm
University of California, Berkeley School of Law

Gertner, Nancy
Harvard Law School

Holder, Eric
Covington & Burling, LLP

Jowell, Jeffrey (IHM)
Blackstone Chambers, United Kingdom

Martin, Jenny
Stanford Law School

McKeown, M. Margaret
United States Court of Appeals for the Ninth Circuit

Mnookin, Jennifer
University of California, Los Angeles School of Law

O’Connell, Anne
Stanford Law School

Rodríguez, Cristina
Yale Law School

Tamale, Sylvia (IHM)
Makerere University, Uganda

Treonor, William
Georgetown University Law Center

Wells, Jr., Theodore
Paul Weiss, Rifkind, Wharton & Garrison

SECTION 5: Anthropology and Archaeology

Antón, Susan
New York University

Brondizio, Eduardo
Indiana University Bloomington

Ferguson, James
Stanford University

Fuentes, Agustín
Princeton University

Larsen, Clark
Ohio State University

Marshall, Fiona
Washington University in St Louis

SECTION 6: Sociology, Demography, and Geography

Liverman, Diana
University of Arizona

McKittrick, Katherine (IHM)
Queen’s University, Canada

Moreton-Robinson, Aileen (IHM)
RMIT University, Australia

Naughton, Lisa
University of Wisconsin-Madison

Nee, Victor
Cornell University

Nelson, Alondra
Social Science Research Council

Patillo, Mary
Northwestern University

Rogerson, Peter
University at Buffalo, The State University of New York

Small, Mario
Harvard University

Torche, Florencia
Stanford University

Ueno, Chizuko (IHM)
University of Tokyo, Japan

SECTION 7: Education

Gutiérrez, Kris
University of California, Berkeley

Kaestle, Carl
Brown University

Loeb, Susanna
Brown University

Noguera, Pedro
University of Southern California

Spillane, James
Northwestern University

Valdés, Guadalupe
Stanford University

Class IV Humanities and Arts

Calhoun, Cheshire
Arizona State University

Churchland, Paul
University of California, San Diego

Collins, Adela
Yale Divinity School

Dupré, John (IHM)
University of Exeter, United Kingdom

Faure, Bernard
Columbia University

Fricke, Miranda
City University of New York

Nadler, Steven
University of Wisconsin-Madison

Olivella, Patrick
University of Texas at Austin

Rietschel, Laura
University of Michigan

Stone, Michael (IHM)
Hebrew University of Jerusalem, Israel
**SECTION 1: Philosophy and Religious Studies, continued**

Sueki, Fumihiko (IHM)  
International Research Center for Japanese Studies, Japan

Sullivan, Winnifred  
Indiana University  
Bloomington

Zaman, Muhammad  
Princeton University

**SECTION 2: History**

Brown-Nagin, Tomiko  
Radcliffe Institute for Advanced Study

Heywood, Linda  
Boston University

Kazin, Michael  
Georgetown University

Lee, Erika  
University of Minnesota

Thornton, John  
Boston University

Troutt Powell, Eve  
University of Pennsylvania

Wilder, Craig  
Massachusetts Institute of Technology

Young, Louise  
University of Wisconsin-Madison

**SECTION 3: Literature and Language Studies**

Baker, Jr., Houston  
Vanderbilt University

Carruthers, Mary  
New York University

Edwards, Brent  
Columbia University

Ellmann, Maud  
University of Chicago

Gallo, Rubén  
Princeton University

Kiparsky, Paul  
Stanford University

Sandler, Wendy  
University of Haifa, Israel

Wang, David  
Harvard University

**SECTION 4: Literature**

Farah, Nuruuddin  
Bard College

Finney, Nikky  
University of South Carolina

Gander, Forrest  
Brown University

Goodison, Lorna (IHM)  
University of Michigan

Harjo, Joy  
Tulsa, Oklahoma

Patchett, Ann  
Parnassus Books

Rankine, Claudia  
Yale University

**SECTION 5: Visual Arts**

Bahrami, Zainab  
Columbia University

Brettell, Richard  
University of Texas at Dallas

Heap of Birds, Edgar  
University of Oklahoma

Nengudi, Senga  
Colorado Springs, Colorado

Singh, Kavita (IHM)  
Jawaharlal Nehru University, India

Sze, Sarah  
Columbia University  
School of the Arts

Temkin, Ann  
Museum of Modern Art

WalkingStick, Kay  
Cornell University

Wilson, Fred  
New York, New York

**SECTION 6: Performing Arts**

Baez, Joan  
San Francisco, California

Chang, Lynn  
Boston Conservatory at Berklee

Johnson, E. Patrick  
Northwestern University

Linklater, Richard  
Detour Film Production

Monson, Ingrid  
Harvard University

Ramsey, Jr., Guthrie  
University of Pennsylvania

Rothman, Carole  
Second Stage Theater

Schneider, Maria  
Maria Schneider Orchestra

Ye, Xiaogang (IHM)  
Beijing Modern Music Festival, China

**Class V**

**Public Affairs, Business, and Administration**

Engelberg, Stephen  
Northwestern University

Liptak, Adam  
The New York Times

Liu, Eric  
Citizen University

Russell, Cristine  
Harvard Kennedy School

Stillman, Sarah  
The New Yorker

Zelizer, Barbie  
University of Pennsylvania

**SECTION 2: Business, Corporate, and Philanthropic Leadership**

Ali, Syed (IHM)  
Lahore University of Management Sciences, Pakistan

Cafaro, Debra  
Ventas, Inc.

Johnson, Abigail  
FMR LLC

Klarman, Seth  
The Baupost Group

Knox, Wendell  
Abt Associates

Lerman-Neubauer, Jeanette  
Neubauer Family Foundation

Lu, Li  
Himalaya Capital Management LLC; LL Investment Partners

Ogunlesi, Adebayo  
Global Infrastructure Partners

Porterfield, Daniel  
Aspen Institute

Tandon, Chandrika  
Tandon Capital Associates

**SECTION 3: Educational and Academic Leadership**

Cauce, Ana  
University of Washington

Khator, Renu  
University of Houston System

Kornbluth, Sally  
Duke University

Mangelsdorf, Sarah  
University of Rochester

May, Gary  
University of California, Davis

Price, Vincent  
Duke University

Roessel, Charles  
Diné College
